Stansted Airport

We provide Air Traffic Control (ATC) services at 14 UK airports. At Stansted Airport we provide tower and engineering services.

TOWER

This is an ATC service provided for the airport and surrounding airspace. The controllers will look out of the tower windows, as well as at the ATC equipment, to give aircraft clearance to taxi, take-off and land.

ENGINEERING

An engineering team, based at the airport, are responsible for maintaining air traffic control services, such as radar and the Instrument Landing System (ILS).

THE OPERATION: 2016

The current tower was opened in 1996.

180,430 flights (+7% on 2015)

24.4m passengers (+8% on 2015)

4th UK's busiest airport (flights)

DESTINATIONS

London Stansted remains one of the UK's fastest growing airport in terms of passenger volumes.

Cancun furthest direct route travelled to

Dublin most travelled to destination

170 airports served

THE AIRPORT

The iconic Lord Foster designed the terminal building. It was opened in 1991 by Her Majesty the Queen. Since then 250 million passengers have passed through it on 3.2 million flights.

63m height of tower

1 runway: 3,048m x 46m
